Use Case #13: Revoke Access for Organization Admin

GENERAL CHARACTERISTICS

Author	Anirudh Bagde, Rupin Bhalla, Catherine Ta
Last Update:	9/25/16
Scope	Backend of HypeU event discovery service
Level	User level
Status	Under review
UML Diagram	See page 7 of 'UML Diagrams.pdf'
Primary Actor	Event Admin User
Secondary Actors	Event Admin User, Database
Stakeholders and Interests	● Event Admin User: Wants to be removed (or needs to be removed) from an organization's admin list
Preconditions	Must be an admin to remove another admin, admin to be removed is an admin of the organization, admin performing the remove is an admin of the organization
Success Post Condition	User is removed as an admin of the organization in the database
Failed Post Condition	Backend will send an error status to the client, admin is not removed from organization

MAIN SUCCESS SCENARIO (or basic flow)

Step	Action
1	Existing admin arrives at organization page
2	Existing admin clicks 'Remove Admin' button
3	Database queries list of admins for the organization
4	Existing admin clicks on admin to remove
5	Database removes the admin selected

EXTENSIONS or Alternate Flows

Step **Branching Action**

2a   Admin is removing a different admin

2b   Admin is removing themselves
1. If the admin is the only admin for the organization, they should not be allowed to remove themselves

5a   An error occurs while sending the verification email
1. Backend sends error message that the admin was not removed

SPECIAL REQUIREMENTS

Req Num	Requirement
0	N/A

TECHNOLOGY AND DATA VARIATIONS LIST

Var Num	Variation
0	N/A

FREQUENCY OF OCCURRENCE: Not often; an admin should only need to revoke a user's admin privileges for an organization once or twice a year

OTHER ISSUES

Issue Num	Issue
1	Should there be a verification prompt that questions the user whatever or not they should remove the user?
